Bank Statement Reconciliation Form

Each month the checkbook balance as shown on the Check Register Form should be reconciled with the bank statement received from the bank. The following format may be used:

Checking account reconciliation for the month ending (located top of statement) July 8, 2015

a. **Bank statement balance**..... 1240.36
(Ending Balance from your current bank statement)

b. **Deposits "In Transit"** 1533.68
(Total of all deposits made which have not yet cleared the bank – that is, deposits made by the treasurer that do not show up in the bank statement. A checkmark should be made on the Check Register Form next to deposits that have cleared the bank to aid in location these each month.)

673.88
859.80

c. **Add the answers to steps A and B above** 2774.04

d. **Checks "Outstanding" Total** 2178.77
(Total of all checks written that have not yet cleared the bank. These will be the checks in the Check Register Form that do not appear on the bank statement. Place a checkmark by checks that clears this month, as in step B above.)

NOTE: Use space to right to list individual check numbers and amounts. Show total in space D

25.75	145.79
144.59	92 -
48.07	155.09
50 -	50 -
500 -	107.78
200 -	39.70
20 -	
600 -	

e. **Ending Balance**..... 595.27
(Subtract D from C above. This should equal the balance in your Register as of the date listed above.)

f. **Register Ending Balance**..... 595.27

g. **Monthly Difference**..... 0
(Subtract F from E above. This should equal zero. If it is positive, then our register is showing more than the bank. If it is negative, then our register is showing less than the bank.)

If those figures don't zero out exactly, one of the following mistakes may have occurred:

1. A mathematical error somewhere in the Check Register Form.
2. A mistake in entering (or failure to enter) a check or deposit in your Check Register Form.
3. A math error in steps A through E above.
4. Entering the wrong figure in step A above.
5. Failure to subtract service charges or add interest in your Check Register Form.
6. If the G is evenly divisible by 9, then there is a transposition somewhere.

woohoo!
